

Appointment of Project Manager

EnviroMission Limited has appointed Mr. John Sibthorpe to the role of Project Manager for the Sunraysia Solar Tower Project.

John joins EnviroMission from Leighton Contractors Pty Ltd, where he held the position of Manager New Business and played a key role managing the successful pre-feasibility development study and subsequent project feasibility stage of Solar Tower development since 2002. Whilst at Leighton, John was also central to the overall reengineering program that has been critical to the current pre-commercialization case for the Sunraysia project.

This appointment will bring seamless and experienced project management built on John's knowledge of all technical aspects of Solar Tower development.

EnviroMission with Macquarie Bank will take Solar Tower development forward by enlisting experts in their field to maximise the potential and opportunity for clean green zero emission power stations for Australia and the global market.

Ends.
