Diluted earnings (loss) per share of (1.7 cents) compared with last years loss of (2.2cents)

Net tangible assets per ordinary share at 30 June 2009 are (0.0037) cents, 30 June 2008, (1.22) cents

4E Preliminary Final Report

On December 19, 2008 shareholders of EnviroMission Limited voted and approved the issue of EnviroMission Ordinary Shares to eligible security holders of SolarMission Technologies Inc., paving the way for EnviroMission to assume control of the global rollout of Solar Tower technology.

In March 2009 the final tranche of \$799,701.13 was received making a total of \$2,214,910.43 received. This investment and subsequent placement of EnviroMission Ordinary Shares and attaching options was approved at the EnviroMission AGM held on December 19, 2008.

EnviroMission (USA), Inc was formed in April 2009 to represent the rollout strategy of EnviroMission Limited in the United States of America, and in particular the south west. An office in Phoenix, Arizona was opened in May 2009.

Litigation between SolarMission Technologies Inc. and a minority SolarMission shareholder, a holder of Special Restricted Stock (Daya Senanayake) has been continuing and in April 2009 EnviroMission was joined to the litigation. This litigation depleted the resources of the company and has taken an inordinate amount of time and energy to defend.

During this period the attorney for Daya Senanayake withdrew from the case citing irreconcilable differences, filed an attorney's lien with the court, and in August 2009 the case was dismissed, with the presiding judge dismissing all claims.

The circumstances around the dismissed claims have proven that this plaintiff caused a demand on vital development resources and also introduced uncertainty to a number of strategic negotiations whilst this case was being resolved. In light of this burden and the considerable financial cost to the business, EnviroMission will seek damages in whatever jurisdiction available.

In June 2009 EnviroMission filed land applications for two discreet sites in the south west of the United States. Each land application has the capacity to allow construction of one 200 MW Solar Tower Power Plant. Each Solar Tower has been modelled to show the equivalent power production of the power usage of approximately 500,000 homes and abating more than 1,000,000 tons of CO₂.

The first stages of a Cultural Resource Survey have been completed and results to date are favourable for development.

In August 2009 EnviroMission signed a Memorandum of Understanding with ARUP (World Leading Engineering Firm) to provide technical project management and lead the engineering requirements for the global development of Solar Tower technology.

ARUP will also assist EnviroMission in the development of contract strategies associated with the commercialisation of Solar Tower technology.

Formal agreement was reached with Raymond James & Associates Inc., a leading US Investment banking firm and under this agreement Raymond James will provide insight and reach to the US Financial Markets. Raymond James has the capability to service the financial requirements from the present through Front End Engineering and Design and ultimate construction of multiple Solar Tower Power Stations. This agreement was signed in August 2009.

An Advisory Panel formed in August 2009, with Robert Zabors accepting the EnviroMission invitation to join this newly formed panel. Mr Zabors will bring a wealth of experience and knowledge related to the entire United States power sector.

On August 24 (US EST) EnviroMission began trading on the OTCQX, a prestigious international market tier. This trading platform will provide the necessary market exposure and trading liquidity through a transparent and reputable market mechanism.

EnviroMission will continue to concentrate development activities in the United States and China.

Consolidated Income Statement
