## Solar Tower Makes Faithful+Gould Featured Project List

**EnviroMission** Solar Tower development has been listed as a 'featured project' of Faithful+Gould's North America operations on the Faithful+Gould website at [www.fgould.com](http://www.fgould.com)

EnviroMission signed Faithful+Gould in June 2011 to provide US based [project management](#) and integrated [commercial services](#) for Solar Tower power station development that will meet the terms of EnviroMission's landmark agreement to sell power from 200MW Solar Tower power station developments in La Paz, Arizona to the Southern California Public Power Authority (SCPPA) (previously disclosed to the ASX and indicated on the renewable energy projects list of the SCPPA website).

EnviroMission Chief Executive, Roger Davey, said "EnviroMission values the priority Faithful+Gould has publicly assigned to its involvement with Solar Tower development in the United States."

President and Managing Director of Faithful+Gould North America, Paul Wood, said "Faithful+Gould is excited to support EnviroMission in delivering an iconic Solar Tower in Arizona."

"The project is a unique example of driving sustainable solutions in the energy market and is a perfect match with Faithful+Gould's deep rooted passion for sustainability in design.

"By combining our local expertise with our global reach, we're able to provide unrivalled project and commercial management services to support this innovative form of power generation," Mr. Wood said in support of the project.

Faithful+Gould is a premier construction consulting company with more than 60 years experience providing total solutions for the built environment to the private and public sector; Faithful+Gould is a member of the WS Atkins group of companies ([www.atkinsglobal.com](http://www.atkinsglobal.com)), one of the world's largest engineering and design consultancies.

Faithful+Gould is headquartered in New York City and employs more than 400 professionals in nearly 20 cities throughout North America.
